

“Many members have shared that they knew being physical with someone was violence, but they were unaware about emotional or sexual forms violence. They tell me that they have been abusive towards their wives unknowingly by being rude to them or by using a harsh tone. They were behaving in such a way towards their wives without realising that they were mistreating their wives. Attending the sessions has definitely made them more aware of their behavior towards their wives and many have been making changes to stop such (negative) behavior. ”

(Group Facilitator from Kapilvastu)
